

Table of Contents

1. Summary	4
(1) Integrity protection of RRC-signalling	5
(2) Integrity protection of user data between the UE and the gNB	7
(3) Cipherring of RRC-signalling	9
(4) Cipherring of user data between the UE and the gNB	11
(5) Cipherring of user data based on the security policy sent by the SMF ..	13
(6) Integrity of user data based on the security policy sent by the SMF	15
(7) AS algorithms selection	17
(8) Key refresh at the gNB	20
(9) Bidding down prevention in Xn-handovers	23
(10) AS protection algorithm selection in gNB change	24
(11) Control plane data confidentiality protection over N2/Xn interface	27
(12) Control plane data integrity protection over N2/Xn interface	29
